DHI-MEETING SCHEDULER

INTRODUCTION:

The DHI Meeting Scheduler is a web-based application designed to streamline the process of scheduling and managing meetings. It provides users with a platform to create, edit, and track meetings efficiently. The application also offers features such as user authentication, profile management, notifications, logout.

TECHNOLOGIES USED:

- HTML, CSS, JavaScript: Frontend development.
- FontAwesome: For icons used in the user interface.
- Chart.js: For displaying analytics charts in the dashboard.
- Boxicons: For additional icons used in the navigation bar.

FEATURES:

USER:

- User Authentication: Secure authentication system for user login and registration.
- Profile Management: Users can update their profile information and preferences.
- Meeting Scheduler: Create, edit, and manage meetings with ease.
- Dashboard Overview: Provides an overview of scheduled meetings, upcoming meetings, and completed meetings.
- Notifications: Keep users informed about meeting updates, reminders, and other important events.
- Logout: Logout from the website.

ADMIN:

- Admin Authentication: Secure authentication system for admin login and registration.
- Account Settings: This link directs users to a page where they can manage their account settings. They may have options to update their profile information, change their password, manage notification preferences, and other account-related configurations.
- Give Feedback: This link allows users to provide feedback about the application. It could lead to a form or a feedback submission page where users can share their thoughts, suggestions, or report any issues they encountered while using the application.
- About: Clicking on this link provides users with information about the application. It may include details about the purpose of the application, its features, the development team behind it, and any other relevant information that users may find useful.

- Support: This link is for accessing support resources related to the application. It could lead to a support page where users can find FAQs, contact information for customer support, help documentation, or a support ticketing system where users can submit their queries or issues for assistance.Getting Started

USAGE:

1. Once the application is running, users can perform the following tasks:

- Login/Register: Users can log in to their existing accounts or register for a new account.
- Dashboard: View an overview of scheduled meetings, upcoming meetings, and completed meetings.
